The IATA Travel Centre: Your passport to peace of mind

Your bags are packed, you're ready to go... but do you have everything you need to board the airplane?

Many travellers are not aware of international travel restrictions and requirements. Things like visitor's visas, foreign entry and vaccination requirements are just some of the details to verify for successful travel preparation.

Unfortunately, many who do check travel requirements consult contradictory or dated sources – resulting in a situation that will still keep them grounded upon airport arrival.

When searching for passport, visa and health information online, it's important to know that your information source is accurate, reliable and – more importantly – up-to-date.

The IATA Travel Centre delivers accurate passport, visa and health requirement information at a glance
